DETAILED ACTION

1. This Office Action is in response to the applicants' amendment received on March 14, 2007.
2. Claims 1-6, 8-11, 18-21, 37, 39, and 40 are presented for examination.
3. The applicants have amended claims 1 and 37 in the amendment received on March 14, 2007. Also, the applicants have cancelled claims 7, 12-17, 22-36, 38, and 41-50.
4. Applicants' arguments with respect to claims 1-6, 8-11, 18-21, 37, 39, and 40 have been considered but are deemed to be moot in view of the new grounds of rejection.

Remarks

5. With regards to the interview held on March 13, 2007, the Examiner extends her appreciation to the applicants' representative. However, after careful consideration and a closer examination of the currently amended claims, the examiner has determined that independent claims 1 and 37 cannot be allowed at this time because of the claim objection presented below in the office action.

Claim Objections

6. Claims 1 and 37 are objected to because of the following informalities:

Claims 1 and 37 have been objected to because these claims do not appear to produce a tangible result for the claim limitation comprising "general search result". The Examiner kindly requests that the applicants review claim 1, at line 9, and claim 37, at line 10. Respectively, both independent claims 1 and 37 recite similar claim limitations. This claim limitation referenced at line 9 in claim 1 and at line 10 in claim 37 recites, **"providing the personalized search result and the general search result"**. At this step, the personal and general search results are being provided. Next, at step **"selecting"**, an advertisement is based on the personalized search object and the advertisement is being displayed based on the personalized search object.

The Examiner does understand that there is a correlation between the personalized search result and a personalized search object. Likewise, independent claims 1 and 37 also provide a general search result and a general search object. But, at the conclusion of the claim, there is no display that corresponds to the general search object. The display produces an advertisement based on the personalized search object. Again, at the conclusion of independent claims 1 and 37, it appears that there should be a consistency within the claims to include a display that would ultimately correspond to the general search object.

Claims 2-6, 8-11, 18-21, 39, and 40 are also objected to for at least the same reasons presented above for independent claims 1 and 37.

Appropriate correction is required.
